

Using TegoTags to Aid Repetitive Inspections

ATA eBusiness Forum – October 2015

Bob Hamlin Chief Technology Officer Tego, Inc.

Air Transport Association

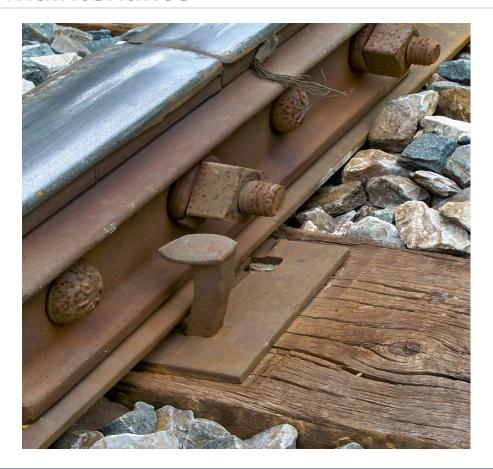

9-5. Radio Frequency Identification (RFID) on Parts

Genesis

- Discussions with the FAA
- Repetitive Inspections
- Use existing standard
- Future operational guidance material

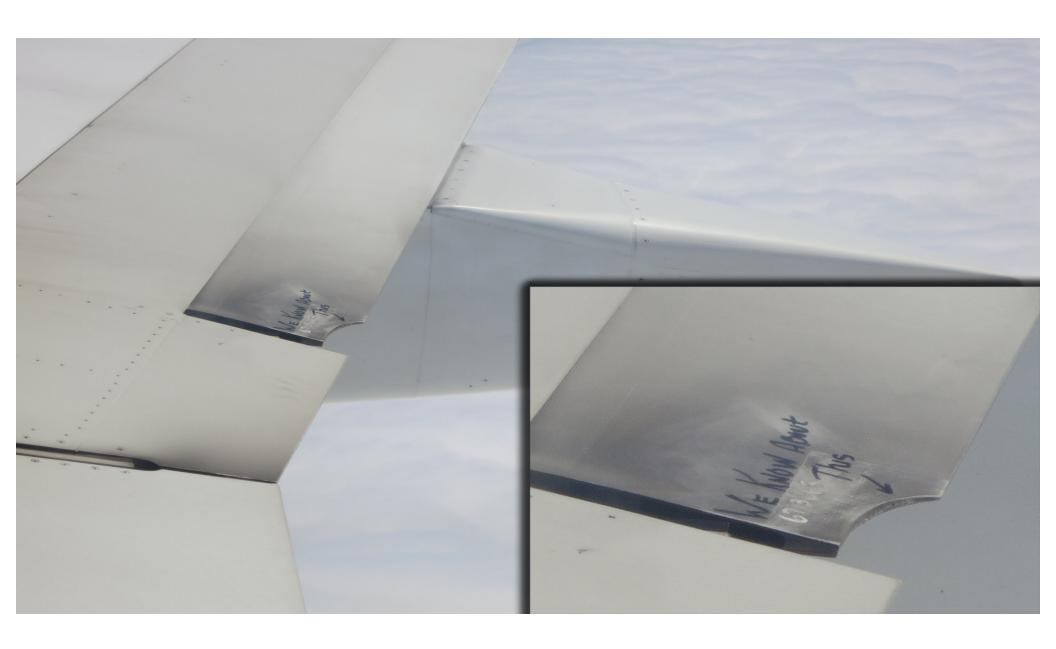

Deferred Maintenance

Aircraft Deferred Maintenance

- Minimum Equipment List (MEL)
- "The operator's FAA-approved MEL allows the operator to continue a flight or series of flights with certain inoperative equipment."
- Appropriate for "items that have been inspected and found within serviceable limits".
- "may require repetitive inspections to ensure continuing airworthiness of the items."

MEL / CDL / Deferred Maintenance - AW 09/30/2013

uestions:			
1	Did the operator ensure aircraft were not released into service with a deferred item(s) that exceeded the deferred item(s) MEL category repair interval time limit?	Yes	
	Updated: Rev. # 4 on 09/30/2012	No, Explain	
		Not	
		Observable	
	Kind of Question: Flag, Supplemental, Domestic		
2	Did the operator track the date, and when appropriate the time, an item was deferred and subsequently repaired?	Yes	
	Updated: Rev. # 5 on 09/30/2013	No, Explain	
		Not	
		Observable	
	Kind of Question: Flag, Supplemental, Domestic	Obscivable	
	Related Performance JTIs:		
	 Check at the record repository and review sufficient records to determine that repairs have been made within 		
	the time period specified in the MEL. (JTI ID: 6) Sources: FAA Order 8900.1, Volume 4, Chapter 4, Section 1		
-	·		
,	Did the operator authorize and control MEL Category B and C extensions to the specified maximum repair intervals?	Yes	
	Updated: Rev. # 5 on 09/30/2013	No, Explain	
		Not	
	Kind of Question: Flag, Supplemental, Domestic	Observable	
1	Was the Certificate Management Office notified within 24 hours of any approval to extend Category B and C items?	Yes	
	Updated: Rev. # 2 on 03/03/2010		
	opacioa: Nov. # 2 on object2010	No, Explain	
		Not	
	Kind of Question: Flag, Supplemental, Domestic	Observable	
	Coloted Devicement (Ties		
	Related Performance JTIs:		
	 Check at the operator's specified location and review that the Principal Maintenance Inspector or the Principal Avionics Inspector has been notified within 24 hours of any extensions to the maximum repair interval for 		

Common Examples

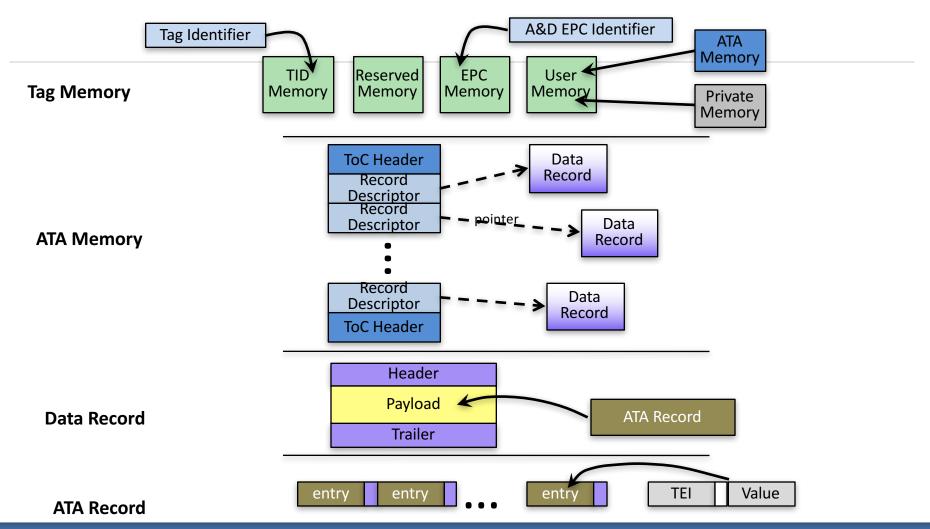

- Fuel leak classifications
- Dent limitations
- Cracks
- Temporary repairs

Spec 2000 Data Organization

EPC Number

"ID"

Birth Record

Pedigree

Part History Record Maintenance/Inspection History

ltem	TEI
CAGE Code	MFR
Part Number	PNO
Serial Number	SER
Part Description	PDT
Date of Manufacture	DMF
Expiration Date	EXP

- CAGE Code
 - CAGE code of the tagging enterprise

- Part Number (PNO)
 - A part number chosen for and assigned to the maintenance item.
- Serial Number (SER)
 - Serial number assigned to the maintenance item.
- Part Description (PDT)
 - "Deferred Maintenance Item"

- Date of Manufacture (DMF)
 - Date the damage occurred or was discovered.
- Expiration Date (EXP)
 - (optional) Date by which repairs must occur.
- Next Higher Assembly Part Number (NHA)
 - Part number of the aircraft part affected by the damage.

- Description of Maintenance Item
 - Proprietary Identifier (ex. _MID)
 - Ex. "Crack, 10mm long, 1.5mm deep"

ltem	Value
CAGE Code (MFR)	Cage code of tagging enterprise
Part Number (PNO)	Part Number assigned to maintenance item
Serial Number (SER)	Serial Number assigned to maintenance item
Part Description (PDT)	"DEFERRED MAINTENANCE ITEM"
Date of Manufacture (DMF)	Date damage occurred or was discovered
Expiration Date (EXP)	(optional) Date by which repair must occur
Next Higher Assembly Part Number (NHA)	Part Number of aircraft part affected by damage
Description of Maintenance Item (Proprietary Identifier)	Description of the damage ex. "Crack, 10mm long, 1.5mm deep"

Spec 2000 Data Organization

 - Tested
 - Repaired

Why keep the data on the tags?

- Many players
 - various inspection locations
 - different enterprises
- Shareable database = complexity
- Network availability
- Security concerns

Role of Standards (from 2012 presentation)

- Assure interoperability
- Satisfy the needs of the users
- Provide for future growth
- Allow for competition
- Resolve conflicts of interest
