

Operational Precision for Aerospace and Industrial Companies

Empowering Teams with a Real-Time, Unified View of Operations
Tied to Business Outcome

ABOUT US

Industrial Solution Provider

Tego Inc. serves as architect, deployer and long-term partner delivering end-to-end solutions. The company's smart connected solutions resolves an organization's operational uncertainty with automated visibility, real-time analytics, and control.

Tego achieves this by transforming the way operational data is captured, integrated, and shared across functional areas. The company's integrated TegoHub™ platform delivers a unified view of operations, unlocking visibility and control across the enterprise. Instead of struggling with blind spots and guesswork, operational teams can plan with true insight and build operational models on real-time data linked to definitive outcomes.

True Partnership: More than Technology

We collaborate with operational leaders to establish structured, repeatable plans and ensure their effective execution. Through collaboration, training, and ongoing support, Tego ensures employees at every level have the confidence and capability to use data and technology to optimize operations. Together with Tego, our customers unlock new opportunities for innovation, sustainable growth, and long-term success, knowing they have a trusted partner to grow alongside them.

Tego's solutions are built for the way you work. What's great about this is we didn't have to overhaul our entire operation; Tego integrated effortlessly, saving us time and resources."

Warehouse Manager
Large Industrial Company

OUR CUSTOMERS

Where We Make An Impact

We serve aerospace and defense organizations, industrial manufacturers, 3PLs, warehouse and distribution organizations, and sterile supply chain suppliers across sectors such as heavy equipment, semi-conductors, and life science manufacturing.

Powering Confident Decisions in a Demanding World

Our customers serve industries where compliance, safety, and traceability are mission-critical. They also navigate global market forces that place constant pressure to produce faster, cut downtime, and lower costs. In every sector, real-time data visibility has become the key to staying ahead in a global marketplace.

That's where Tego comes in. We bring **operational precision** to teams that are too often:

- Stuck with fragmented systems and siloed data
- Forced into reactive firefighting instead of prevention
- Making decisions in the dark without real-time information

We Solve Key Operational Challenges

We solve the most common operational challenges shared by industrial companies, including:

- **Volume Volatility** → *Stabilize planning amid unpredictable demand*
- **Repeatability** → *Eliminate inefficiencies with consistent, reliable processes*
- **Demand Planning** → *Extend forecasting visibility and improve production alignment*

With Tego, leaders gain the visibility and confidence to run smarter, safer, and more efficient operations.

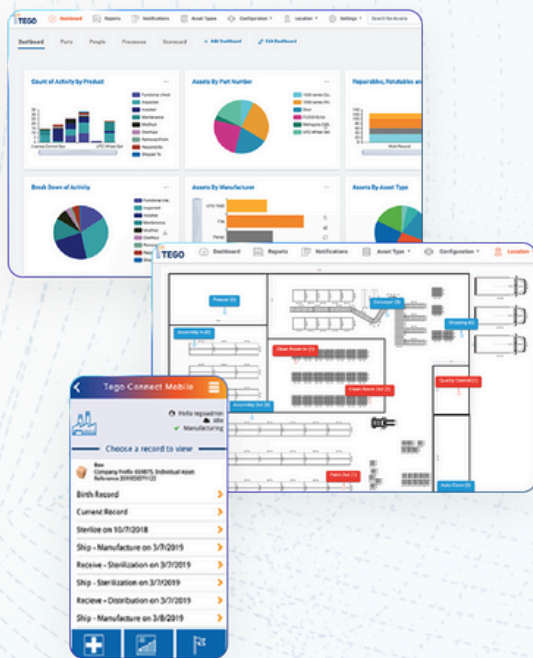

Smart Connected Solutions

TegoHub™ powers our smart connected solutions, giving organizations a unified, real-time view that aligns people, parts, and processes with business outcomes. The platform adapts to any operation by integrating software, hardware, and business processes from both Tego and other systems into a unified, scalable solution. TegoHub™ empowers operational teams to plan with real insights—not guesswork—by building models grounded in real-time data and directly tied to measurable impact.

Why Industry Leaders Choose Tego Inc.

It's operational intelligence — delivered in real time, on your terms.

- Built for Frontline Chaos
- Truly End-to-End: One partner for devices, data, and analytics—no patchwork of vendors.
- No Rip and Replace
- Real Partnerships
- Real-world business results

We bridge the gap between operations and insights—turning data into measurable value. By eliminating hidden costs and unlocking operational agility, Tego gives operational teams a competitive edge in volatile markets. With a focus on collaboration, integrity, and outcomes, we deliver solutions that exceed expectations.

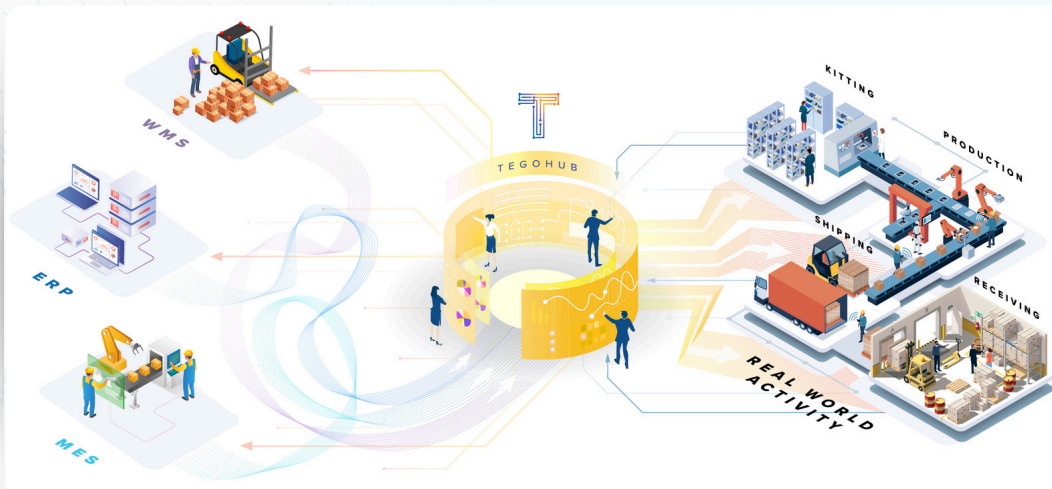

One System-Wide View of Everything That Matters

Tego provides a modular, scalable solution providing real-time awareness across an enterprise. The solution captures data directly from the people performing the work, to the materials and inventory in play, to the processes being carried out, and transforms it into actionable business intelligence.

This is where all the moving parts—people, tasks, tools, reporting—come together. Real-time alerts and KPIs give your team the power to proactively address risks, monitor production flow, and make data-backed decisions at every level.

TegoHub™

The TegoHub™ platform is the backbone of the solution, supporting operations at every level of the enterprise. Whether hosted in the cloud or run on-premise, TegoHub collects, integrates, and analyzes data across your operations and organization.

- Full transparency into work-in-process and bottlenecks
- Automated alerts to prevent quality and process issues
- Configurable dashboards and scheduled reporting
- Easy integration with your existing IT/OT ecosystem
- Integrated real-time reporting that incorporates finance data, supply chain information and scheduling details

Operational data is integrated with other system data (ERP, MES, WMS, Data Lakes, etc.) and brought to life in clear, dynamic dashboards in our flexible reporting platform.

Proof Points

Tego's Smart Connected Solutions Deliver Real-World Results:

- Aerospace manufacturer reduced late ship dates by 68%
- Industrial manufacturer salvaged 20% more inventory
- Industrial plant improved throughput by 15% with real-time production insights.
- Reduced job turnover by 12%

Let's Orchestrate Your Operations Together

We don't just deliver solutions—we make sure they're understood, adopted, and optimized.

The proof of who we are is in the solutions we provide:

- Deep aerospace & industrial expertise
- Secure, scalable, future-ready platform
- Dedicated implementation & support services
